

G5Q-EL3 Power PCB Relays

New
Product
Introduction

OMRON
ELECTRONIC COMPONENTS

OMRON is pleased to announce the release of new high inrush and long electrical life G5Q-EL3, capable of handling 30A inrush current and 300K operations.

KEY FEATURES & BENEFITS:

<u>Features</u>	<u>Benefits</u>
Capable of handling 30A inrush current/ break 3A, 250VAC	High switching capacity
300K operations	Long electrical life
Standard footprint	Easy option for your existing projects
Small size	Saves board space
Conforms to EN603351 (glow wire)	High flame resistance
Conforms to EN60079-15	Explosion proof

APPLICATIONS:

- Home Appliance (Pumps, Motors, Valves, Compressors, Heaters)
- Power Supplies
- Lighting Controls
- Inverters
- Temperature Controllers

OTHER NEW POWER RELAYS:

G5NB-EL

High capacity switching with
compact size

G5Q-EL

Long life, high
capacity type

G5Q-EL2

Long life, high inrush
